The all-new BMW 3 Series: Built for Thrill. Driven by Tech

New Delhi, The all-new BMW 3 Series, the power-packed seventh generation of the world's most iconic sports sedan, was unveiled today at the 'Thrill City' in Gurugram. Locally produced at BMW Group Plant Chennai, the all-new BMW 3 Series is now available in diesel and petrol variants at all BMW dealerships across India.

Mr. Rudratej Singh, President and Chief Executive Officer, BMW Group India said, "The 3 is the heart and soul of BMW. As the ultimate sports sedan, for over four decades, it has been the flag bearer of 'Sheer Driving Pleasure'. In its new avatar, the 3 has outdone itself once again! Built for thrill and driven by technology, the all-new BMW 3 Series is an automobile that creates an impeccable harmony between the driver, the machine and the road.

'Thrill City', a unique pop-up space, reflects the

Mr. Rudratej Singh, President and CEO, BMW Group India with the all-new BMW 3 Series (6)

pulse of modern city life, full of buzzing entertainment, high skylines, city squares and even has its own night-club. Created exclusively for the launch, it showcases the

highly-urban, dynamic and spirited personality of the all-new BMW 3 Series.

The all-new BMW 3 Series is available in two diesel variants (BMW 320d

Sport and BMW 320d Luxury Line) and in one petrol variant (BMW 330i M Sport) which are locally produced. The ex-showroom prices are as follows - BMW 320d Sport INR 41,40,000, BMW 320d Luxury Line-INR 46,90,000, BMW 330i M Sport -INR 47,90,000. The all-new BMW 3 Series makes an incredible impression with segment-first technologies for an even better driving experience. Making its debut in the all-new BMW 3 Series is the BMW Virtual Assistant, a digital personality of the vehicle that responds to voice commands. It sets a new benchmark for voice recognition. Drivers can operate a number of car functions simply by speaking to their BMW Virtual Assistant. It can be addressed by saying "Hey BMW" or a customer-defined wake word, thereby adding an individual touch to the car. Hands do the talking with BMW Gesture Control, which is part of a rigorously thought-out operating concept that recognizes six pre-defined hand movements for control of a number of functions. The spread of driver assistance systems is more extensive than ever. The Reversing Assistant provides unmatched support in reversing out of a parking spot or through narrow driveways. It keeps a record of the last 50 metres driven and assists by taking over the steering.

Business Brief

Broadcasters wary of TRAI decision on review pricing

New Delhi, Broadcasters have raised concerns over the Telecom Regulatory Authority of India's (TRAI) decision to review the issue of pricing, barely eight months after implementing the new tariff order.

They fear that the intrusive approach by the regulator will only discourage and disincentivise fresh investments into the sector, which can have dire consequences. Smaller channels and networks may even face an "existential crisis" in case TRAI implements a fresh pricing model.

TRAJ, which noted that the broadcasters have been offering discounts of up to 70 per cent for bouquets compared to a la carte rates causing discrepancies for consumers, has come out with a fresh consultation paper to look into the issue of pricing of channels by broadcasters, cable operators and distribution platforms. However, analysts said that the consultation paper 'Tariff-related issues for broadcasting and cable services' relating to the new tariff order (NTO), which came into force from February 1, did not take into account that consumers across the world opt for bouquets rather than individual channels as the former are cheaper.

HK protests: Facebook removes China-based fake accounts

San Francisco, Facebook has removed seven Pages, three Groups and five accounts originated in China and involved in posting fake news pertaining to the ongoing protests in Hong Kong.

The individuals behind this campaign engaged in a number of deceptive tactics, including the use of fake accounts — some of which had been already disabled — to manage Pages posing as news organisations, post in Groups, disseminate their content, and also drive people to off-platform news sites.

"About 15,500 accounts followed one or more of these Pages and about 2,200 accounts joined at least one of these Groups," Nathaniel Gleicher, Head of Cybersecurity Policy at Facebook, said in a blog post late Monday. "Although the people behind this activity attempted to conceal their identities, our investigation found links to individuals associated with the Chinese government," he added. Based on a tip shared by Twitter about activity they found on their platform, Facebook conducted an internal investigation into suspected coordinated inauthentic behaviour in the region and identified the malicious accounts. Earlier, users on the social bookmarking website Pinboard slammed China-backed advertisements being run on Twitter, attacking Hong Kong protesters.
